In re Application of LUCOVSKY et al.
Serial No. 10/017,680

Listing of the Claims:

1.   (currently amended) In a computer network, a method comprising,

providing a ~~service~~ services schema, the ~~service~~ services schema

having ~~service~~ services-related fields arranged into a content document with

defined structures for the fields;

receiving a data access request directed to service information, the

request including associated identity information; and

in response to the data access request, manipulating at least one set

of data in a logical ~~service~~ services document that includes data therein according

to the associated identity information, each set of data in the logical ~~service~~

services document structured to correspond to a field in the content document.

2.   (currently amended) The method of claim 1 wherein manipulating at

least one set of data comprises reading data from at least one field in the logical

~~service~~ services document.

3.   (currently amended) The method of claim 1 wherein manipulating at

least one set of data comprises writing data to at least one field in the logical

~~service~~ services document.
